ALUMINUM A-TIPPER

The Crysteel A-Tipper is designed for contractors and municipalities that need strength, durability and lightweight efficiency.

The Crysteel aluminum A-Tipper has been updated with innovative features and a modern aerodynamic design, providing contractors corrosion resistance and lower maintenance costs in a long lasting, durable aluminum body. The A-Tipper comes with the all-new, positive independent locking latch that allow users to easily drop the tailgate, spread-through, or simply remove. Weighing up to 50% less than traditional carbon steel dump bodies, aluminum's lightweight profile saves fuel costs, as well as tire and brake costs, while increasing payload capacity. Plus, for every 10% reduction in vehicle weight, there is a 5-7% increase in fuel economy. Over time, that equals significant savings, making the Aluminum E-Tipper a great value.

Standard Features

- New lightweight design
- New single panel tailgate with Crysteel's exclusive, independent upper tailgate latching
- 3/16" 5052 Aluminum construction
- Rigid sides with single panel reverse bend
