KNAPHEIDE FUEL AND LUBE TRUCKS

Keeping all of your heavy equipment up and running under today's demanding deadlines just got easier with the standard features built into the Knapheide Fuel and Lube Trucks.

Available in multiple configurations, Knapheide Fuel and Lube Trucks are constructed of a rugged steel shell that is corrosion resistant for durability you can count on.

Choose from a variety of options to customize your truck to best meet the needs of your jobsite.

STANDARD FEATURES

- A** Rugged galvanized steel body construction for durability and corrosion resistance
- B** Modular platform design allows for flexibility in product tank layout
- C** LED S/T/T, B/U lights and reflectors are in accordance with FMVSS 108 regulations
- D** Four adjustable work lights for improved visibility in low light conditions and LED compartment lights
- E** 1,000 gallon elliptical fuel tank with 3/16" steel wall construction with flat panel in center for displaying company graphics (KFLT-1 model only, KFLT-2 has 2,000 gallon tank) and emergency shut off, roll over protection system, and two lift hooks located on top of the tank
- F** Aluminum roll up rear door for convenient access to all tank reels and control panel
- G** Underbody storage compartments on each side of the body
 - Compartments include double spring over-center door retainers for elimination of involuntary swing and refined, automotive quality, paddle-activated, rotary style latches

*Body may be shown with optional features

- H** Product tanks mounted to an innovative platform side rail using isolaters which isolates twisting and vibration to eliminate tank stresses
- I** Product tanks constructed of 3/16" steel with vented fill cap and replaceable sight gauges
- J** Hydraulic air compressor with FLR system
- K** Reel cabinet features electric rewind for fuel and spring rewind hose reels for all other products
- L** 20 lb. fire extinguisher located in reel compartment for operator safety
- M** Body is fully immersed in Knapheide's electrodeposition prime paint system for superior corrosion resistance
- N** 120 lb. grease drum with 50:1 air operated shovel pump and high pressure grease reel (not shown, located on street side)

*Body may be shown with optional features

AVAILABLE MODELS

Model	Recommended Chassis	Axle	Elliptical Fuel Tank
KLT1	Class 6/7	Single	None
KLT2	Class 8	Tandem	None
KFLT1	Class 7	Single	1,000 gal.
KFLT2	Class 8	Tandem	2,000 gal.

Since 1848, The Knapheide Manufacturing Company has continued to be an industry leader, with a vast distribution network and expert staff ready to help.

COMMITMENT TO CORROSION RESISTANCE

Corrosion shouldn't be a concern when you buy quality Knapheide products. To give you the best protection from corrosion, we installed our state-of-the-art, custom-designed electrodeposition prime paint system. Our E-coat system bonds prime paint to steel by an electroplating process, to give you a superior coat of primer resulting in better corrosion protection compared to spraying methods. Complete immersion in our E-coat results in a prime coat that provides the best chemical and solvent resistance. Because of our commitment to corrosion resistance, you should never worry about the quality of your Knapheide products.
